DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Several phrases in the claim are vague, misleading and/or confusing. For example, "the packaging material... we are proposing" (claim 2, lines 2-3) it is not clear which organizing structure applicant is referring to and how applicant is utilizing the packaging material in the organizing structure since the recited structure limitations therein must affect the method in a manipulative sense, and not to amount to the mere claiming of a use of a particular structure. Applicant is claiming to use the packaging material into the organizing structure without claiming the required steps to do so. And therefore it is not clear how applicant is packing the new tool in the packaging material and how it can be utilized directly into the organizing structure.

Further, "the packaging material" and "the organizing structure" lack proper antecedent basis.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Purkapile (5217115).

Purkapile discloses an organizational system (see fig. 16) for a mechanical too box or container to help organize an existing tool collection and also allow for addition and deleting from the tool-organizing matrix, as needed (see col. 3, lines 30-38).
